In light of unprecedented gun violence in our country and here locally in Ingham County, we elected leaders in charge of running our respective cities, villages, and townships ask Prosecutor Carol Siemon to reconsider her internal felony firearm charging policy. The current Michigan felony firearm statute MCL 750.227b carries a mandatory 2, 5 or 10 years sentence upon conviction.

Some city, township and village leaders may see the need to change the penalties associated with this offense, but until then to “no longer charge the offense except under the most extreme circumstances” as her policy states, does not hold people properly criminally accountable, and increases the likelihood of additional gun violence in the communities we are tasked to govern, lead, serve, and protect.
